BioEdit Masterclass

Explore, Align & Analyze DNA Sequences

AN ONLINE TRAINING PROGRAM & WORKSHOP

Unlock the power of sequence analysis with Bio-Edit, one of the most widely used bioinformatics tools for DNA sequence editing and alignment. This hands-on training will guide participants through DNA sequence interpretation, Sanger sequencing chromatogram analysis, multiple sequence alignment, and mutation detection — essential skills for molecular biology and genetic research.

Key Learning Outcomes

- ✓ Understand BioEdit interface and project setup
- ✓ Sanger sequencing chromatograms for base calling
- ✓ Mutation Detection
- ✓ Export and interpret results for publication

Venue: Zoom Platform

Registration fee : Rs. 550/-

Credentials will be sent to the registered participants a day before the scheduled date

Date : 13.12.2025 (Saturday)

Timing : 10.00 AM to 1.30 PM
